2200-NIIMS <u>National Irrigation Information Management System (NIIMS)</u> is written in NATURAL programming language using the software A/G ADABAS for storage. The NIIMS application provides standardization of irrigation billings and collection processing procedures. Use of the system by the Irrigation Projects provides accurate billing and accounting for customers and the Bureau of Indian Affairs (BIA). The NIIMS application operates on the Z800 computer at the National Business Center (NBC) in Lakewood, Colorado.

The BIA has trust responsibility for over one million acres of irrigable land, with gross income of more than 200 million dollars. These lands are supervised by six Regional Offices. At each Regional Office, there is an Irrigation Project which currently maintains their billing and collection records in individual formats. Recent audits of the Irrigation Projects have identified a need to standardize and automate the billing and collection procedures.

NIIMS is an application that supports billing and collection for the Bureau of Indian Affairs' irrigation projects which have costs that are reimbursable to the federal government. The application is limited to BIA Irrigation personnel and management.

The system contains data from 1960 to present and contains the land and owner/operator information, irrigation account information such as bills/receipts, collections and payments received.

### A. Source Records/Inputs

1. Source Records (Paper):

The inputs to the system include land ownership, leases and documents related to land transactions.

The database files contain information on irrigation bills, ownership, project, financial information from collections.

Disposition Instructions: Apply disposition instructions approved for paper and microfilm records. (Reference Indian Affairs Record Schedule record series for specific program records)

2. <u>Source Records (Electronic)</u>: Electronic files or records used to create or update a master file, including, but not limited to, work files, valid transaction files, and intermediate input/output records. (GRS-20/1b)

**Disposition Instructions: TEMPORARY.** Delete after information has been transferred to the master file and verified.

### B. Master Data File

The file structure contains all ADABAS database files, data sets, and file layouts that allow the indexing, storing and retrieving of irrigation data. There are multiple master files within the NIIMS and currently 48 database files that comprised NIIMS.

**Disposition Instructions: PERMANENT.** Create duplicate copy of records off-line and physically transfer to the National Archives upon approval of this schedule in accordance with NARA instructions and guidance. Subsequent legal transfer of the records will be as jointly agreed to between DOI and NARA, in accordance with regulations currently cited in 36 CFR 1228.270. (N1-075-07-4)

Data restricted in accordance with Privacy Act Notice; Indian Individual Monies Trust Funds-OS-02 (previously Individual Indian Monies-Interior, BIA-3); Indian Land Records-Interior, BIA-4; Indian Land Leases-Interior, BIA-5; Integrated Records Management System Interior, BIA-25.

### C. System Generated Documents/Outputs

1. System Generated Documents in Case Files: Case files specific queries, sorts, reports, tables, and related records and data compilation reports (e.g., management reports and plans) that are created for case files, studies, inquiries, inspections, and related program files.

# Disposition Instructions: Apply disposition instructions approved for paper and microfilm records. (Reference Indian Affairs Record Schedule record series for specific program records)

2. System Generated Documents organized by Program, Regional, Agency or Field Offices: Data compilation reports (e.g. management reports and plans) that are not case file specific and generated bi-weekly, monthly, quarterly, and annually. These reports can not be easily separated and filed in case specific files. (N1-075-07-4)

**Disposition Instructions: PERMANENT. Printed Report Files.** File by System Report Name, Program, Region, Agency or Field Office, Job Run Date and Fiscal Year. Cut off at the end of the fiscal year. Maintain in office of record for a maximum of 2 years after cut off or when no longer needed for current business operations; and then retire to records center. Subsequent legal transfer of the records to the National Archives of the United States will be as jointly agreed to between United States Department of Interior and the National Archives and Records Administration.

3. Data Verification Reports or Screen Prints, Data Verification – Non case/subject file specific screen prints, test reports, data validation reports and system diagnostics.

a. Electronic files or records created solely to test systems performance, as well as hard-copy printouts and related documentation for the electronic files/records. (GRS-20/1a)

**Disposition Instructions: TEMPORARY.** Delete/Destroy when the agency determines that they are no longer needed for administrative, legal, audit, or other operational purposes.

b. Electronic files or records used to create or update a master file, including, but not limited to, work files, valid transaction files, and intermediate input/output records. (GRS-20/1b)

**Disposition Instructions: TEMPORARY.** Delete after information has been transferred to the master file and verified.

c. Electronic files and hard-copy printouts created to monitor system usage, including, but not limited to, log-in files, password files, audit trail files, system usage files, and cost-back files used to assess charges for system use. (GRS-20/1c)

**Disposition Instructions: TEMPORARY.** Delete/Destroy when the agency determines that they are no longer needed for administrative, legal, audit, or other operational purposes.

d. Records create and retained for asset management, performance and capacity management, system management, configuration and change management, and planning, follow-up, and impact assessment of operational networks and systems. Includes, but is not limited to: Data and detailed reports on implementation of systems, applications, and modifications; application sizing, resource and demand management; documents identifying, requesting, and analyzing possible changes, authorizing changes, and documenting implementation of changes; documentation of software distribution and release or version management. (GRS-24/3b1)

**Disposition Instructions: TEMPORARY.** Destroy/delete 1 year after termination of system.

#### D. Documentation

1. System Data specifications, file specifications, code books, record layouts, user guides, output specifications, final reports, regardless of medium, relating to a master file or database. (N1-075-07-4)

Disposition Instructions: PERMANENT. Transfer to the National Archives with Master Data file as identified above.

2. Copies of Records relating to system security, including records documenting periodic audits or reviews and re-certification of sensitive applications, disaster and continuity plans, and risk analysis, as described in OMB Circular No. A-130. (GRS-20/11b)

**Disposition Instructions: TEMPORARY.** Destroy or delete when superseded or obsolete.

### E. Backups/Vital Record Backups

Backups are intended for making a copy of computer files for use if the original is lost, damaged or destroyed. The Backup process includes copying recorded information from internal storage to an external storage medium, such as magnetic tape, cartridges, CDs, and Optical disk. The Disposition of Backups is Temporary because they are intended to restore a system in case of failure. Backups do not meet NARA requirements for long term retention or preservation of permanent data. **(GRS-20/8a)** 

**Disposition Instructions: TEMPORARY.** File identical to records scheduled for transfer to the National Archives: Delete when the identical records have been captured in a subsequent backup file or when the identical records have been transferred to the National Archives and successfully copied.
